

## PRODUCT DATA

| Parameter                                                                                                                  | Value                                                                                                                                                                             |
|----------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| USB powered                                                                                                                | can be connected to any USB converter or PC outputs (min. 0.5A). Recommended power supply - 1A.                                                                                   |
| *Caution. In some cases it is not possible to revive fully discharged cells. Avoid fully discharging lithium-ion batteries | this significantly reduces their lifetime and capacity. In the absence of the ability to control the level of battery discharge, use batteries with an integrated PCB controller. |
| Suitable for charging all 3.6V                                                                                             | 3.7V 10440 - 26650 Li-ion batteries                                                                                                                                               |
| Rechargeable cell sizes                                                                                                    | 10440, 14500, 14650, 16340, 17500, 17670, 18350, 18500, 18650, 18700, 22650, 25500, 26650                                                                                         |
| Power source                                                                                                               | USB cable                                                                                                                                                                         |
